

Turn Translation & Knowledge Data into Decisions that Matter

Real-time BI designed for language,
content, and knowledge teams.

Smarter Decisions, Less Effort

See the full picture instantly – all translation and knowledge metrics in one secure place.

Act in Real Time

Changes in the portal update instantly in your BI view, so you can respond the moment trends shift.

Focus on What Matters

Role-based access means every team sees only the KPIs relevant to them.

Go Deeper When You Need To

Drill down from high-level trends to detailed views by language pair, LLM, requester, or asset.

Save Time on Reporting

Skip the manual work and pivot quickly with ready-to-use, live data from both insourced and outsourced projects.

Track Quality and Speed

Monitor turnaround times, on-time delivery, complaints, and productivity across all languages.

Turn Insight into Action

With data connected directly to your working environment, you can act immediately instead of waiting for the next report.

Three levels of insight:

Standard BI Module

A Clear View of Your Key Metrics

Track essential metrics on usage, costs, languages, and delivery dates – a strong foundation for insight.

Included with your portal

Advanced BI Module

From Insight to Optimisation

Go beyond the basics with dashboards that reveal detailed KPIs on performance, quality, and efficiency – designed to give you sharper insights across teams and languages.

Upgrade option

Enterprise BI Module

Built Around Your Business

Tailor-made datasets, KPIs, and reporting designed to match your organisation's goals and decision-making needs.

Fully tailored solution

Who It's For & Why It Wins

Role-specific insights. Instant impact. Growth without limits.

From localisation managers to department heads, Exfluency BI puts the right insights in the right hands – without manual imports, reporting delays, or guesswork.

Localisation Managers

Track cost, speed, and quality across every language pair to deliver on time and on budget.

Content Operations

Monitor delivery performance by project or department and tackle bottlenecks before they slow you down.

Knowledge Base Managers

Measure document growth, asset usage, and template adoption to maximise your content library's value.

Department Heads

Review the ROI of every translation request and uncover opportunities to optimise spend and resources.

Contact Us

Discover how Exfluency BI can help your teams make faster, better decisions.

Every view is context-aware, showing not just what happened but why. And as your needs grow, you can scale from the included Standard BI to Advanced or Enterprise, ensuring your data capabilities keep pace with your ambitions.
